Question 1 [C01] [10 Points]

Flight 007 has a luggage allocation of 35kg per customer. For any **extra luggage** the customer has to pay an **extra charge** at a specified counter. The extra charge is calculated using the formula, **Extra Charge = (Luggage Weight - 35) * 3 + Seat Number * 21**

You are tasked to take the luggage weight and seat number from the customer as input and calculate the extra charge and print which counter they have to go to based on the given table.

Conditions	Counter Number
Extra Charge <= 100	4
100 < Extra Charge <= 200	3
200 < Extra Charge <= 300	2
Extra Charge > 300	1

Sample Input	Sample Output
48 6	You have to pay BDT 243.0 Please go to counter 2
33 56	You have to pay BDT 0.0 Please go to counter 4
